- Can I rely on Paul or not?
- We were ashamed of our chemistry test results.
- There was no lack of interest when our teacher suggested a trip to the Science Museum.

7 Complete the article with the correct form of the words in capitals.

Life on Mars?

Year by year, our little planet is becoming 1) overcrowded. As the human population continues to grow, 2) scientists are looking for planets which humans could colonise. One popular 3) suggestion is that Mars will be our new home. However, it is icy cold and has very little carbon dioxide. At present, humans would be 4) unable to survive there. But the big difference in the atmospheric 5) composition of Earth and Mars hasn't stopped people from dreaming! One 6) chemist experts have made for heating up the planet is to build 'greenhouse gas factories'. They say these factories could take in carbon dioxide and give out oxygen, just as plants do on Earth. As 7) likely as it may seem, these ideas may become reality one day. However, humans are 8) unlikely to be living on Mars for many centuries to come.
