Developed in association with BBC Worldwide and BBC Learning English

We’ve retained the most popular clips and included some wonderful new material to engage and motivate learners.

New reading and listening texts
We’ve broadened the range of texts to reflect what learners read outside the classroom. Listening texts are more authentic and include a wider variety of international accents.

New pronunciation sections
The stronger pronunciation syllabus includes a wider range of pronunciation features.

New images and clearer design
The improved design of all the components makes them easier to use. New and dramatic images motivate learners, and provide great prompts for language activities.

New supplementary material
One thing teachers always ask for is ‘more’: so we’ve given you more grammar, more vocabulary, more pronunciation and more activities in Speakout Extra.

New, improved MyEnglishLab
Improved functionality, including learner feedback, makes it easier for teachers and learners to track their levels of achievement through each level and through the course.

Message from the authors
We asked teachers and learners around the world for feedback on every level of the course. What did they like? What worked well in class? What changes would they like to see?

We then took a fresh look at every single exercise in the series and improved or updated it based on the feedback we’d received.

Global Scale of English
Speakout 2nd edition is aligned to the Global Scale of English. The Global Scale of English is a standardised, granular scale from 10 to 90, which measures English language proficiency. Unlike other frameworks, which describe attainment in broad bands, the Global Scale of English identifies what a learner can do at each point on the scale across speaking, listening, reading and writing skills.
