Technical English

About the Course

Technical English 2nd Edition is a four-level course for students in technical or vocational education, and for company employees in training at work. It covers the core language and skills that students need to communicate successfully in all technical and industrial specialisations.

- Technical concepts are clearly presented using motivating texts and clear illustrations.
- Topics reflect the latest developments in technology and are relevant to student's professional needs.
- The course uses core language common to a range of specialisations.
- Grammar is regularly practised and there is a comprehensive grammar summary section.

The Global Scale of English

The GSE is a numerical scale, which measures English language proficiency. It is also a framework of Learning Objectives that describes what a student can do at every level of proficiency on the scale for each of the four skills: listening, reading, speaking and writing. GSE enables teachers and learners to answer the following questions accurately:

- How good is my English?
- What progress have I made towards my learning goal?
- What do I need to do next to improve?

It is fully aligned to the Common European Framework of Reference for Languages (CEFR), but the numerical scale enables proficiency to be measured more accurately, more regularly and within a CEFR level. This keeps learners motivated as they see regular evidence of progress.

GSE helps teachers find the right course materials for the exact level and learning goals of their students. The chart below shows the range of objectives that are covered within the content. Knowing this helps you select course materials with the right level of support and challenge for your learners to help them make progress.

Technical English has been created using the GSE Learning Objectives for Adult Learners. These have been used to ensure that the content and activities are at the correct level and have informed the lesson goals given at the start of each unit. *Technical English* is aligned with the Global Scale of English and the Common European Framework of reference. It takes learners from CEFR A1 to C1 (20-80 on the Global Scale of English). Each lesson guides students to a 'Can Do' goal in line with the Global Scale of English and the Common European Framework 'Can Do' statements.

Using the information in this teacher booklet

The GSE teacher booklet lists the key Learning Objectives for listening, reading, speaking and writing covered in *Technical English*, unit by unit. There are several ways in which this information can be used:

- This list of Learning Objectives is more complete than the list of learning goals given in the unit opener. On the way to mastering those learning goals, students will practice a number of subskills, which may not be the main focus of the lesson. They will also revisit previous skills that, again, will not necessarily be the main focus of the lesson. The teacher booklet list gives you a more complete picture of what is being studied
- The list can be used to support any reporting that you have to do (e.g., for students or for admin purposes)
- It also allows you to navigate a pathway through the course content for those classes where you do not want to (or do not have the time to) cover everything. The learning objectives enable you to see quickly the language functions that are most relevant to your students

The GSE Teacher Toolkit

This is a free online database that gives you easy access to all the GSE Learning Objectives, GSE Grammar, GSE Vocabulary and the GSE Text Analyzer (to estimate the GSE level of a written text). Access the database at <https://www.english.com/gse/teacher-toolkit/user/lo>.

The GSE Teacher Toolkit is a searchable database that will save you time when planning lessons:

- Explore GSE Learning Objectives that are at the same level as your coursebook – to make lessons relevant to your particular students or to provide additional practice at the appropriate level of proficiency
- Search the GSE Grammar database to find lesson plans and worksheets that supplement the grammar in your coursebook – as additional or remedial practice
- Examine the GSE Vocabulary database by topic to find additional vocabulary items and phrases
- Cut and paste a reading text into the GSE Text Analyzer to check that it is at the right level of challenge for your students

Technical English and the Global Scale of English

The following tables provide an overview of the GSE learning objectives that underpin each unit. Where GSE values are shown in *italics* it indicates the GSE values are currently in draft form.
